# Our History

Starboard Consulting is a Gold-accredited IBM Premier Business Partner and IBM Maximo Asset Management reseller.

A woman owned business; Starboard was established in 2007 to provide a more hands-on approach to Maximo implementations utilizing both a proven implementation methodology, with a keen focus on user experience, into highly regulated industrial environments. This focus on the user began to set Starboard apart from other Maximo service providers in the industry.

Today, Starboard Consulting is recognized by its customers and the Maximo community as a leader and subject matter expert on best industry practices and repeatable implementation success.
